Whats not to like about this game? Everything is still great, even in 2019. Mods like brutal doom make the experience a hell lot more enjoyable, though..

. If you like to replay the same game over and over again on the same map with a time limit of 1-2 hours per game, then this is for you.

Honestly, the concept is good, but not that much variety from buildings and units.

Also always playing on the same map and the time limit makes it really boring. A campaign would have maybe the 5\ac worth it, but without it this game is just 2\ac worth. Won't recommend to buy it. Music and Sounds aren't made that well too.. Really lovely tycoon/wine-making sim. Simple graphics, relaxing and catchy soundtrack, interesting decisions and time/space management.

Yes, there is a bit of reading upfront, but it's nothing you shouldn't be able to get through in about 15 or 20 minutes. Remember the days when games actually came with manuals? This is a little like that.

I got this game on sale for \$6 and it was absolutely worth every penny.. Rather overpriced title for its content. Well, it works. You will be able to accelerate, brake, turn and follow the track. I must admit that's a huge step forward since MR Collection. But there is a single issue with this game - respawn. Let yourself take a loose turn and you'll respawn behind the opponents. It wasn't problem in the older titles since they always had arcadey "track walls", but here this illusion of open world kinda ruins the feel of it. Design-wise locations in this game are more than bland. It feels like they actually used original design guidelines from

90s as some areas feel utterly empty. It would be okay in early PS3 days, but unfortunately for this game there are much better 10 years old motorcycle sims out there. It's also funny that they used Unreal Engine, but in the end it looks like Unity. Still demands a quite powerful rig to run. So basically it's a huge no-no for such a price.. Does not start on my computer using windows 7, even when running as an administrator with compatibility mode set to Windows XP service pack 2.. Interesting concept but unwieldy controls and incomprehensible story, can't recommend it.. Hey, I'll play with you some other time!. This is the best game I have ever played.. The English Men Rising (English Production. Language: EN).

Awesome Movie about the legendary Nordschleife.

Many Driving Test, Walktroughs, Exploring the different Race Sections. A real Bike-Experience.

Great video about a past Racetime. U can see the changes of time from past to today.

Many popular names like: Kenny Roberts, De Agostini and so on.

Impressive views of different Race Sections like: Karussell, Fuchsring, Brunnchen. And also the Bergwerk Section, where was the Race Accident of Niki Lauda many time ago. The speed sequence: Döttinger Höhe. Many walks around the ring to learn to drive the best racelines later in the race. It's the german Isle of Man. And for me my alltime favorite Racetrack of the World. Not only a track. It's a challenge to his own person. The most nicest 21KM of the world and the greatest Race Track ever. (Get in u car or bike. Visit the Nordschleife \ Adenau. Pay a few bucks. And drive some rounds @ this amazing Race-Track. Then u will understand me). I like the Track-Previews with descriptions. Nice one.

Take a look @ the Entrance of the Nordschleife called Hatzenbach, or take a seat in the Nordschleife-Race Taxi to explore the Ring.

Many careers of popular (german) Race Drivers (and personal friends) like: Dirk Adorf, Sabine Schmitz and so on has started here.

Maybe a better Resolution would be great. The Video is from 2004. HD would be much better, but for a real race-track fan like me, it doesn't matter.

All in one a great Video with many nice impressions. More a Race Mentary \ Documentary

I can recommend to buy. My Fazit: 9 \ 10

As the first reviewer here I will say that this game has its issues with aim, but all in all its a very fun wave shooter for the price tag.

Its worth what it costs.. Fantastic game. 120 levels that are very nicely and systematically integrated and divided from light to heavy. The yellow and orange world are a real challenge for the players. The graphics are extraordinary, the control of the game is excellent, the music is mystical. Once you finish the game, you will want it again and again ... All references. Good start so far... waiting for controller support. xD

I'll see what features are added before recommending.. Alright babbys first negative review here I go.

I do like this game, I gave me a positive first impression. As I played through I started to forgive a few of the things that annoyed me during the start. Then as it progressed instead of giving me more things to like it gave me the same gameplay as earlier and more things to be annoyed about. I know this is still in development and will be ready to change this review to positive after some fixes.

Disposable Heroes is not ready to be a complete game yet but has potential.

Below is my first impressions video covering what the game is and the start with minimal spoilers if you would like to see. Under that I have listed the pros and cons with minor spoilers (pros and cons will make more sense if you have played or seen the video).

<https://www.youtube.com/watch?v=b4nNmf2Bacl>

Pros:

- this game is fun
- it's funny
- the art style if you don't judge it it really cool
- the save point system makes up for cheap deaths and mistakes
- purchasable "powerups" allow for easier clears if you choose
- decent variety of rooms and enemies
- decent variety of pickups
- weapons potions and random "spells" are very fun to use
- co-op has potential

Cons:

- no in game options/pause menu to turn down sound or rebind keys or check inventory
- UI lackng, I picked up a health potion but until I use it it is very hard to remember which it is
- sound is really loud at some points and not at others, cannot change volume in game
- hitboxes across everything are odd
- hitboxes off for all traps especially lasers, all spinning enemies, all spinning projectiles, everything in the minigames
- the controls are buggy, in single player sometimes you get wasd to move some times you get the arrow keys, if you plug in a controller things go to hell
- co-op controls buggy as well, the only way we got it to work was for P1 to suffer wasd with c v and P2 using controller stick and n m
- P1 and P2 are limited to only two character choices instead of four? Why? (and yes I wanted to play as the boobie girl solo)
- the auto progression through rooms feels well out of place, why is it there?
- ♥♥♥♥ing compulsory minigames, they are♥♥♥♥♥and out of place
- not sure if it was a bug but why is a whole level (Caves) hidden behind a ♥♥♥♥♥ minigame?

I would like to point out again that I do like this game and will change this review to positive after some fixes. Hope my review was helpful.. Nobody on to play with. Very ambitious project for a 2 man team. The concept is very good, but they should have made this game free for early access and charge later. This way, people can play it and see for themselves how good it is and bring along friends. Why pay money for a game that has nobody else online to play with? Can't recommend a game that costs \$5 with a non-existent player base.

Game is also not optimized fully. I have a high-end machine and I get anywhere from 40-60 FPS and the graphics are not groundbreaking in the least.

I spent the 5 bucks already so I'll try hopping on from time to time see if anyone else is on. Not much else I can do...lul.
